

## **Keynote on- Regenerative Education!**

*Craig Elevitch, PhD has worked in agroforestry since 1991. Craig's internationally recognized publications and workshops have guided thousands in becoming more proficient in regenerative agroforestry and reforestation. He has 14 books to his credit including Agroforestry Guides for Pacific Islands (2000), Traditional Trees of Pacific Islands: Their culture, environment, and use (2006), Specialty Crops for Pacific Islands (2011), Agroforestry Landscapes for Pacific Islands: Creating abundant and resilient food systems (2015), and Agroforestry Design for Regenerative Production (2023, in press). His agroforestry publications have been downloaded millions of times. He has authored dozens of agroforestry, Forest Stewardship, and native forest dedication plans throughout Oceania and the tropics. In addition to working directly with growers and educators, he has facilitated over 200 agroforestry workshops, with over 10,000 producers and resource professionals participating since 1993. Craig is the co-lead developer for the Agroforestry Design Tool (AgroforestryX.com), an online assistant for planning regenerative agroforestry systems. He was honored with the Shining Stars of Oceania award in 2019 and the Global Aloha 'Aina 'Ohana award in 2016. Craig holds a PhD in Electrical Engineering (Systems) from Cornell University for research focusing on agroforestry growth modeling.*
